

Live Life. Better.

Your home is where real life happens. It's where you raise your children and have family get together. It's where you create new memories, where you grow, and where you dream.

We get that. And we are committed to building superior homes...homes that become places to nurture you and your loved ones.

You set the bar high. So do we.

- We treat our clients fairly, with uncompromising honesty and integrity.
- We build lasting relationships with customers and associates.
- We offer superior quality at a price that reflects affordability and lasting value.

Bottom line?

The mission of Clark & Company is to deliver the highest quality housing while ensuring complete satisfaction of both customers and associates.

We want your home to enhance your life.

Clark & Company is locally owned and operated. We build unique homes, from small to large, for customers who truly appreciate quality and meticulous attention to detail.

What is a Home of Distinction?

It is unique. It complements your life with features that are usable and practical, features that make your life easier and more enjoyable. It is a home with character, not simply a place to live.

Maybe you need an elaborate and ornate home that allows you to entertain friends and family. Or, maybe you are more concerned about energy efficiency and sustainable building. Perhaps you need to downsize without sacrificing quality. Because your needs are unique, you need a home that is distinct.

Whatever your needs, Clark & Company can help you make them reality.

We offer houses that are significantly different from the competition. We have an unwavering attention to detail and quality. Our houses are finished with many upgrades that make your life more enjoyable. We offer great curb appeal, as well as interiors that are interesting, exciting, and functional. We believe form is equal to function. We often hear from prospective customers that our houses have great depth of character.

EarthCraft House

We are dedicated to meeting your needs and the needs of the environment. Our participation with EarthCraft House allows us to stay true to both commitments.

EarthCraft House is a “green” program that promotes the building of environmentally friendly homes and serves as a blueprint for healthy, comfortable homes that reduce utility bills and protect the environment.

Energy Star Homes

In addition to following EarthCraft guidelines for building, Clark & Company builds houses that meet stringent Energy Star standards.

Compared with standard homes, an Energy Star home will cost substantially less to heat and cool. This results in significant budget savings every month.

And, simply put, that's a smart investment.
